

Amendments to the Specification

Kindly insert the following replacement paragraph for the paragraph on Specification page 57, lines 4-12:

In the exemplary embodiment the light emitting devices include an array of LEDs of different colors embedded on a flexible circuit. For example, Figure 22 represents light emitting device 31. However, it should be understood that in the exemplary embodiment all the light emitting devices are generally similar. Light emitting device 31 includes an array of LEDs 304 connected through a circuit on a flexible substrate such as a polyimide film, for example, DuPont KAPTON® Kapton® material, and includes a flexible connector portion 306. The flexible connector terminates in an electrical connector 308. Electrical connector 308 is releasably connectible to a driving circuit or other electrical circuit in the machine which operably connects to one or more controllers for purposes of controlling the illumination of the light emitting device.
